## PROFILE

Software Engineer with an M.Sc. in Data Science & AI and a B.Sc. in Computer Science, specializing in AI-driven software solutions, real-time data integration, and intelligent automation. Experienced in building full-stack applications, scalable IoT systems, and automated enterprise workflows using Python, Next.js, Flutter, and cloud platforms. Proven ability to design data pipelines, bridge industrial hardware to analytics platforms, and translate complex data requirements into production-ready software. Seeking to leverage AI/ML techniques and strong software engineering fundamentals to build smart, data-driven applications.

## EXPERIENCES

**Intern Software Engineer @ IOT Slutuin (PVT) Ltd** **November 2024 - June 2025**
Contributed to IoT-based SCADA systems, CMS portfolio platforms, and mobile/web UI designs while establishing baseline data logging workflows.

**Software Engineer @ IOT Slutuin (PVT) Ltd** **June 2025 - April 2026**
Developed a Flutter-based HR attendance app and architected real-time data ingestion gateways streaming PLC (Snap7) metrics into SCADA applications and databases for downstream analysis.

**Research and Development Engineer @ Alta Vision (PVT) Ltd** **May 2026 - August 2026**
Engineered end-to-end automated solar service workflows and site-specific technician attendance systems; built an enterprise Next.js/Firebase inventory platform with automated accounting, production line tracking, and role-based access control.

## PROJECTS

**PrimePro - Car Wash Management & Booking Platform**

- Architected a multi-platform solution using React Native for the customer mobile app and React for the admin web portal, backed by a microservices/RESTful Spring Boot backend and MySQL database.
- Designed operational management modules within Spring Boot to streamline employee scheduling, automated payroll processing, and center resource management.
- Implemented real-time service tracking and analytics dashboards, enabling customers to monitor booking statuses while providing center operators with actionable operational metrics.
- Engineered secure REST APIs and structured relational schemas in MySQL to handle high-frequency booking requests and synchronization between mobile and web clients.

GitHub :

- (frontend) - https://github.com/avishkaindunil/PrimePro_Web_Application.git
- (backend) - https://github.com/avishkaindunil/PrimePro_BackEnd.git

**PrescripSamrt - Healthcare Management & Digital Prescription Platform**

- Architected a web-based healthcare platform using PHP (MVC), MySQL, HTML5, CSS3, and JavaScript to eliminate illegible handwriting through standardized electronic prescriptions.

- Engineered modules for digital lab results and online appointments, streamlining patient workflows and facilitating real-time collaboration between doctors and pharmacies.
- Designed relational MySQL database schemas to securely store patient records, prescription logs, and appointment schedules with transactional integrity.
- Developed interactive front-end interfaces with JavaScript to ensure seamless user experience across healthcare providers and patients.

GitHub:

- https://github.com/senuriwick/PrescripSmart.git

**Todo Mobile Application**

- Engineered a cross-platform mobile app using Flutter and Dart, integrating Firebase Authentication for secure multi-method user login.
- Implemented real-time data persistence with Cloud Firestore to enable instant CRUD operations (Create, Read, Update, Delete) and dynamic state synchronization across devices.
- Designed a responsive UI layout utilizing structured state management patterns to ensure fluid task updates and low latency user interaction.

GitHub:

- https://github.com/shanikaayasmanthi/MyTodo_Front.git

**My Portfolio**

- Built a responsive single-page application using React and modern CSS to showcase projects, technical skills, and professional experience.
- Configured automated CI/CD pipelines using GitHub Actions to streamline testing and continuous deployment directly to Vercel.
- Optimized asset delivery and load performance, achieving high global accessibility and seamless cross-device rendering.

---

## EDUCATION

**M.Sc. in Data Science & AI** **(present)**
University of Sri Jayawardhanapura

**B.Sc. in Computer Science** **(2022 - 2025)**
University of Colombo School of Computing

**A/L Physical Science** **(2020)**
Sujatha Vidyalaya, Matara
A - Combined Maths | A - Chemistry | B - Physics

---

## TECHNICAL SKILLS

| | |
|---|---|
| **Languages & AI/Data Science** | JavaScript, Java, PHP, Golang, Python, R, C, SQL, Data Analysis, OCR |
| **Web & Mobile Development** | WordPress, HTML, CSS, Spring Boot, React, Angular, Laravel, Flutter, Firebase, NextJs, NodeJs, PWA |

| | |
|---|---|
| **Database** | MYSQL, Postgre SQL, Firestore, InfluxDB |
| **Other Technologies and Tools** | GitHub, MS Office, Figma, Notion, GitHub Actions, Vercel, Azure, Firebase Cloud, Netlify, Docker, postman, WAMPServer, Xampp |

## CERTIFICATES AND EXTRACURRICULAR ACTIVITIES

**AWS Educate Introduction to Cloud 101**
Amazon Web Service

**Python for Beginners**
**Python Programming**
**Web Design for Beginners**
**Front-End Web Development**
**Back-End Web Development**
Open Learning Platform - University of Moratuwa

**Web Master (2023-2024)**
Entrepreneur and Innovation Club of UOC

**Member**
Rotaract Club of UCSC

**Member**
Becon Club of UOC
